

The resolution (S. Res. 86) was agreed to.

The preamble was agreed to.

(The resolution, with its preamble, is printed in today's RECORD under "Submitted Resolutions.")

APPOINTMENTS

The PRESIDING OFFICER. The Chair, on behalf of the President of the Senate, pursuant to Public Law 106-286, appoints the following Member to serve on the Congressional Executive Commission on the People's Republic of China: the Honorable MARCO RUBIO of Florida.

The Chair, on behalf of the President of the Senate, pursuant to Public Law 85-874, as amended, appoints the following individual to the Board of Trustees of the John F. Kennedy Center for the Performing Arts: the Honorable ROY BLUNT of Missouri.

The Chair, on behalf of the Democratic leader, pursuant to Public Law 96-114, as amended, appoints the following individual to the Congressional Award Board: the Honorable JOE MANCHIN of West Virginia.

ORDERS FOR THURSDAY, FEBRUARY 26, 2015

Mr. McCONNELL. Mr. President, I ask unanimous consent that when the Senate completes its business today, it adjourn until 11 a.m., Thursday, February 26; that following the prayer and pledge, the morning hour be deemed expired, the Journal of proceedings be approved to date, and the time for the two leaders be reserved for their use later in the day; that following leader remarks, the Senate then resume consideration of the motion to proceed to H.R. 240 postcloture, and all time during the adjournment or recess of the Senate count against postcloture time.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR ADJOURNMENT

Mr. McCONNELL. If there is no further business to come before the Senate, I ask unanimous consent that it stand adjourned under the previous order, following the remarks of Senator WHITEHOUSE for up to 15 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. McCONNELL. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. WHITEHOUSE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

CLIMATE CHANGE

Mr. WHITEHOUSE. Mr. President, I am here for the 90th time to urge my

colleagues in the Senate to take action on climate change. The science is clearly worthy of our trust, and it is indeed time to wake up.

The human contribution to climate change is no longer up for legitimate debate. We know that carbon pollution accumulates in the atmosphere. We know that carbon dioxide traps the sun's heat. We have actually known that since Abraham Lincoln was President. We know that the atmosphere and the oceans are heating up. We can measure that.

Ocean acidification and sea level rise are also measurable, and they are caused by carbon pollution. These risks to our environment, to our health, to our economy, and to our national security are every week more apparent.

News this week from New York City was that an advisory panel of scientists, engineers, and risk management experts just reported that the sea level rise along that city's shoreline—approximately 12 inches since 1900—may have expanded Superstorm Sandy's flood area by as much as 25 square miles, flooding the homes of some 80,000 people. That is pretty real.

The report's prognosis for the future puts the city in pretty deep water. New York City expects its local sea levels to rise by 11 to 21 inches more by 2050 and as much as 6 feet by 2100.

When he was mayor, Michael Bloomberg began in the wake of Hurricane Sandy an ambitious plan to shore up New York with levees, with storm barriers, and with other coastal defenses to make that great city more resilient in the face of rising seas. That plan is estimated to cost nearly \$20 billion to fortify just one city, albeit a great one—New York City—against rising seas.

Let's look south to another major American metropolitan area, Miami-Fort Lauderdale, which also faces daunting projections of rising sea levels.

This map I have in the Chamber shows 3 feet of sea level rise in Miami-Dade County. This is before. This is after. As we can see, they have lost acres. All of this back to the coast is gone, acre upon acre of that city. This nuclear power station right here, Turkey Point, and this sewage treatment plant which serves that municipal area have both become islands.

I visited Florida last year to hear firsthand about the threats that climate change poses to the Sunshine State. I met Glenn Landers, a senior engineer at the U.S. Army Corps of Engineers, Everglades Division. He has worked on water resources and restoration projects in Florida for nearly 20 years. This is the map he used to show me what just 2 feet of sea level rise would mean for South Florida. There is a lot less of it.

Like New York, they have measured almost 1 foot of sea level rise in South Florida in the last 100 years. And like New York, the Southeast Florida Regional Climate Compact—which is a bi-

partisan coalition of four South Florida counties—once we get away from this building, it turns out this can actually be a bipartisan issue; that cloud of special interest money that wraps the Congress isn't as apparent when you get to Florida counties. That bipartisan coalition predicts, like New York, again, continued sea level rise. Indeed, the waters around southeast Florida could surge up to another 2 feet in less than 50 years. As we can see, most of the iconic Everglades—which is the largest tract of wilderness east of the Rocky Mountains and home to some of the most rare and endangered species in America—will be under seawater.

Now, there is some resemblance between New York and Florida in the threat of sea level rise. But the resemblance to New York diverges when we look at some of the unique features of the Florida peninsula.

First is its low elevation. Miami is just 6 feet above sea level. Six feet of sea level rise goes a long way.

Second, southern Florida, as the Army Corps of Engineers constantly attests, rests on porous limestone. In New York, levees and dams can be built that will hold the ocean back. They can fortify New York City and wall it in like Holland. In Miami, they would be building those structures on a geological sponge. The rising water will just seep right under. And even in the higher areas that might still stay dry, saltwater will infiltrate the underground drinking water.

Of all the people and all the homes in the Nation at risk from rising seas, an estimated 40 percent are in the State of Florida. The Risky Business Project estimates that between \$127 billion and \$150 billion worth of property in Florida will be under the mean high tide by 2050. You might want to be careful where you buy in Florida these days if you plan to be around a while.

If we take into account damage from coastal storms, Florida could face an additional \$4 billion in damage per year.

Luckily, Florida is home to a number of the country's leading research institutions. Scientific experts at Florida universities are actively researching and trying to plan for the State's changing climate.

Professor Harold Wanless of the University of Miami puts it pretty bluntly:

Everyone wants a nice happy ending. But that's not reality. We're in for it. We have really done a job warming our ocean, and it's going to pay us back.

The Florida Climate Institute is a network of universities and public organizations that provides Florida policymakers and businesses with reliable, region-specific, factual information. The group includes the University of Florida, Florida State, the University of Miami, Florida A&M, the University of Central Florida, Florida Atlantic University, the University of South Florida, and Florida International University.

Let me focus on Florida International University in Miami. FIU leads the Florida Coastal Everglades Long Term Ecological Research Program to study the effect of climate change and human activity on freshwater availability in the Everglades. FIU hosts the International Hurricane Research Center on its campus and recently established the Extreme Events Institute, devoted to making communities more resilient to extreme weather.

Institute director Richard Olsen, who is an international expert on disaster response and resiliency, has called sea level rise “a slow onset disaster” for South Florida.

Four professors of FIU’s School of Journalism and Mass Communication set up a media outreach initiative called Eyes on the Rise. Students in this program have produced documentaries to air on local television about the effect of sea level rise on local communities, on real estate prices, and on economic growth in southern Florida.

FIU is a member of the American College and University Presidents’ Climate Commitment, a network of schools taking action to reduce greenhouse gas emissions and promote climate research. FIU has adopted a plan to bring emissions 25 percent below 2007 levels before 2030.

On my Florida visit, Dr. Mike Heithaus, a marine scientist and dean of the College of Arts and Sciences at FIU, said:

We’re really standing here at ground zero. There’s just about nowhere else on the planet where there is more at risk from sea level rise so fast.

He gets it. They get it. That is why Florida International University is at the fore of climate research and education, particularly as it affects the State of Florida.

But there is another member of that faculty who doesn’t seem to get it, one of our Senate colleagues, the junior Senator from Florida. He teaches political science part time at FIU. Last month, however, that junior Senator from Florida voted against amendments to the Keystone XL bill stating that climate change is real and that humans contribute to it. Apparently the message from experts across Florida and frankly from experts across campus that manmade climate change, especially sea level rise, is a big problem for southern Florida—well, apparently that message hasn’t gotten through.

What are Florida’s other elected officials doing? Fort Lauderdale mayor Jack Seiler is working with NOAA, State and Broward County officials, and the South Florida Regional Planning Council to protect his city from flooding and climate change. Miami Beach mayor Philip Levine showed me the huge pumps his city has installed to pump out the flooding that comes in on high tides and from storms. Republican mayor Sylvia Murphy of Monroe County, which covers all of the Florida

Keys and some of the Everglades, is a remarkable lady, and she has put climate and energy policy at the heart of her 20-year growth plan for the county. She is going to lose a lot of her county if we don’t get ahead of this. And the senior Senator from Florida, my friend BILL NELSON, is an outspoken advocate for preserving the Florida coast and the Florida economy in the face of climate change.

The Miami Herald recently wrote:

South Florida owes Senator NELSON its thanks for shining a bright light on this issue. Everyone from local residents to elected officials should follow his lead, turning awareness of this major environmental issue into action. It is critical to saving our region.

So said the Miami Herald.

Unfortunately, the junior Senator does not seem to have followed his senior colleague’s lead either in shining a bright light on this issue or in turning awareness into action.

It is a little bit surprising that, according to a recent New York Times poll, an overwhelming majority of Americans support us taking action on climate change, including half of Republicans. Again, this is not that partisan of an issue once you get away from the pollster money that surrounds this building. Two-thirds of respondents said they would be more likely to vote for a candidate for President or for the Senate who explicitly campaigned on a platform of climate action.

Mr. President, I ask unanimous consent to continue for an additional 2 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. WHITEHOUSE. That includes 48 percent of Republicans as opposed to only 24 percent of Republicans who said they would be less likely to vote for such a candidate. So even among Republican voters, the balance tips in favor of climate action. If you look at young Republican voters—as I have said over and over on this floor—under the age of 35, they think climate denial is ignorant, out of touch, or crazy. Those are the words they selected in the poll, not my words.

Let’s move west to Arizona. The folks at NASA—a pretty reputable organization—have a rover driving around on Mars right now that they control. These are people who know something about what they are doing, and the folks at NASA have made understanding our planet and its systems their life’s work. This month their researchers released a study showing an 80-percent chance of a decades-long what they call “megadrought” in the American Southwest, a multi-decade drought between 2050 and 2099 unless we act aggressively to mitigate the effects of climate change. Arizona could see half as much precipitation in the second half of the century as it did in the second half of the last century. It is a call to arms to protect the State of Arizona.

Finally, here is this morning’s newspaper headline: “As ice melts, the future fades. Climate change may force Alaska natives to abandon their village.” LISA MURKOWSKI, the Senator from Alaska, is quoted here. Senator MURKOWSKI acknowledges the impacts of climate change on Alaska’s coastal community.

So maybe we are beginning to make some progress, but all around the country these effects are ones we have to begin to take more seriously. It is indeed time to wake up.

I yield the floor.

ADJOURNMENT UNTIL 11 A.M. TOMORROW

The PRESIDING OFFICER. The Senate stands adjourned until 11 a.m. tomorrow.

Thereupon, the Senate, at 6:23 p.m., adjourned until Thursday, February 26, 2015, at 11 a.m.

NOMINATIONS

Executive nominations received by the Senate:

DEPARTMENT OF ENERGY

MONICA C. REGALBUTO, OF ILLINOIS, TO BE AN ASSISTANT SECRETARY OF ENERGY (ENVIRONMENTAL MANAGEMENT), VICE INES R. TRIAY, RESIGNED.

DEPARTMENT OF THE TREASURY

AMIAS MOORE GERETY, OF CONNECTICUT, TO BE AN ASSISTANT SECRETARY OF THE TREASURY, VICE CYRUS AMIR-MOKRI, RESIGNED.

DEPARTMENT OF COMMERCE

WILLIE E. MAY, OF MARYLAND, TO BE UNDER SECRETARY OF COMMERCE FOR STANDARDS AND TECHNOLOGY, VICE PATRICK GALLAGHER, RESIGNED.

DEPARTMENT OF THE TREASURY

ANNE ELIZABETH WALL, OF ILLINOIS, TO BE A DEPUTY UNDER SECRETARY OF THE TREASURY, VICE ALASTAIR M. FITZPAYNE, RESIGNED.

DEPARTMENT OF STATE

KATHERINE SIMONDS DHANANI, OF FLORIDA, A CAREER MEMBER OF THE SENIOR FOREIGN SERVICE, CLASS OF COUNSELOR, TO BE AMBASSADOR EXTRAORDINARY AND PLENIPOTENTIARY OF THE UNITED STATES OF AMERICA TO THE FEDERAL REPUBLIC OF SOMALIA.

SHEILA GWALTNEY, OF CALIFORNIA, A CAREER MEMBER OF THE SENIOR FOREIGN SERVICE, CLASS OF MINISTER-COUNSELOR, TO BE AMBASSADOR EXTRAORDINARY AND PLENIPOTENTIARY OF THE UNITED STATES OF AMERICA TO THE KYRGYZ REPUBLIC.

UNITED STATES POSTAL SERVICE

MICKEY D. BARNETT, OF NEW MEXICO, TO BE A GOVERNOR OF THE UNITED STATES POSTAL SERVICE FOR A TERM EXPIRING DECEMBER 8, 2020. (REAPPOINTMENT)

DEPARTMENT OF JUSTICE

CONO R. NAMORATO, OF VIRGINIA, TO BE AN ASSISTANT ATTORNEY GENERAL, VICE KATHRYN KENEALLY, RESIGNED.

IN THE AIR FORCE

THE FOLLOWING NAMED OFFICER FOR APPOINTMENT IN THE UNITED STATES AIR FORCE TO THE GRADE INDICATED WHILE ASSIGNED TO A POSITION OF IMPORTANCE AND RESPONSIBILITY UNDER TITLE 10, U.S.C., SECTION 601:

To be general

GEN. ROBIN RAND

IN THE ARMY

THE FOLLOWING NAMED OFFICER FOR APPOINTMENT IN THE UNITED STATES ARMY MEDICAL CORPS TO THE GRADE INDICATED UNDER TITLE 10, U.S.C., SECTIONS 624 AND 3064:

To be major general

BRIG. GEN. JEFFREY B. CLARK

THE FOLLOWING NAMED OFFICER FOR APPOINTMENT IN THE UNITED STATES ARMY NURSE CORPS TO THE GRADE INDICATED UNDER TITLE 10, U.S.C., SECTIONS 624 AND 3064:

To be major general

BRIG. GEN. BARBARA R. HOLCOMB
